Comments

MONTOPOL OP1 Opacifier.

MONTALINE C40 Polyvalent quaternised coconut oil: foaming agent and extra-fluid thickening agents that is easy to use (it is incorporated at cold temperatures or at any step of the process). It is the ideal cosurfactant of sodium lauryl ether sulfate. It protects barrier function of the skin and prevents drying effect of SLES (limitation of TEWL).

PROTEOL OAT Surfactant based on essential amino acids of oats. It has good foaming and wetting properties yet does not dry out the skin (does not affect TEWL). Due to its high skin tolerance level, PROTEOL OAT is especially well-suited for formulas intended for delicate skin. It generates a rich, creamy foam.
