A New generation...

SESAFLASH™

An original, patented molecular combination containing sesame to instantly and visibly smooth the skin. Rejuvenation, firmness and comfort guaranteed ! (*in-vivo* proven efficacy).

An original, patented molecular combination containing sesame to instantly and visibly smooth the skin. Rejuvenation, firmness, moisturization and comfort guaranteed ! (*in-vivo* proven efficacy).

SEPIMAT™ HB-V

Ultra-soft hollow and ultra light microspheres that impart a “powdery” effect at low use doses. They are easy to use as they are dispersible either in the oil phase or in the aqueous phase, this property allows formulators to make very powdery formulations containing low level of oily materials. In O/W, W/O or W/Si emulsions, only 0.5% of SEPIMAT™ HB-V is enough to prevent formulations from being greasy and to get a powdery feel.

SEPICALM™ VG

A successful marriage between palmitoylproline and water lily flower extract reaching a unique whitening and soothing effect. Thanks to a new action towards both a modulation of inflammation mediators and a reduction of genetic expression of tyrosinase (key enzyme of pigmentation), SEPICALM™ VG decreases cutaneous pigmentation induced by stress or aging process (in vitro and in vivo proven efficacy)
