

**T ZONE MATIFIER
CREAM TO POWDER**

- **Off-white & shiny compact cream**
- **Packaging: tube**
- **A cream with a powder touch. Texture is transformed with SEPIMAT™ H10 FW!**
- **SEPICONTROL™ A5, a biomimetic active enriched with an extract of cinnamon, purifies and clears the T-zone.**
- **CODIAVELANE BG/PF, rich-in-sugar marine active, gives the fundamental hydration needed all along the day.**
- **SEPINOV™ EMT 10 brings a satin-smooth aspect to this cream gel that is perfect for oily and acne prone skin.**
- **SEPIMAT™ H10 FW guarantees a real matifying effect thanks to its excellent oil absorption capacity.**

EU07249A - 1401

Formula

A	Aqua / Water	Up to 100%
	SEPICONTROL™ A5	4.00%
	SEPIMAT™ H10 FW	10.00%
	Phenoxyethanol and Ethylhexylglycerin	1.00%
B	CODIAVELANE™ BG/PF	2.00%
	SEPINOV™ EMT 10	3.00%
	Isohexadecane	3.00%
	Cyclopentasiloxane and Cyclohexasiloxane	5.00%
	Parfum / Fragrance	0.30%

Procedure

(Trimix + deflocculator – 7 kg)

Introduce phase A into the tank and mix until homogenization. Prepare phase B and mix with a spatula during 2 minutes. Introduce B into A and mix. Scrape walls and mix again. Pull vacuum before opening the tank.

Characteristics

Appearance	Off-white & shiny compact cream
pH	5.0
Viscosity 1M at RT	75000 cps Brookfield S4S6
Viscosity 1M at 45° C	79000 cps Brookfield S4S6
Viscosity recovery at RT (after 1M at 45° C)	87000 cps Brookfields S4S6
Stability*	1M at RT, in cycles -4/+40° C

Raw materials from SEPPIC

SEPICONTROL™ A5

Capryloyl Glycine and Sarcosine and Cinnamomum Zeylanicum Bark Extract

Dermo-protecting and soothing agent that helps rebalance oily acne prone skins. It works by regulating the five main factors involved in skin imperfections: bacterial proliferation, 5 α-reductase, lipases and elastases, free radicals, inflammation and hyper-keratinisation. Skin becomes clearer, purified and free from imperfections.

SEPIMAT™ H10 FW

Methyl Methacrylate Crosspolymer and Squalane

SEPIMAT™ H10 FW consists of hollow hemispheres with a smooth surface that deliver softness and a matte effect in formulation. This versatile powder is both hydro and lipodispersible and has excellent oil absorption capacity.

SEPINOV™ EMT 10

Hydroxyethyl Acrylate / Sodium Acryloyldimethyl Taurate Copolymer

Powder polymer «2-in-1», thickening in a wide pH range (3-12), ready to use, with an excellent stabilizing properties at low level and in presence of a high % of oily phase. Sensory profile: "satin" touch, fresh, glide-on.

CODIAVELANE BG PF

Butylene glycol/aqua-water/codium tomentosum extract

Water soluble active extracted from "velvety alga" to facilitate high hydration by its richness in marine sugars.

Other raw materials...

- Phenoxyethanol and Ethylhexylglycerin : **Euxyl PE9010 (SCHÜLKE & MAYER)**
- Cyclopentasiloxane and Cyclohexasiloxane : **XM PMX345 (DOW CORNING)**
- Parfum / Fragrance : **Parfum Neutrophile (EXPRESSIONS PARFUMÉES)**
