

**RENAISSANCE LIP TINT
PLUMPING OIL**

- **Aspect:** shiny pink oil
- **Packaging:** gloss paint brush
- **A new generation of Make-Up inspired by Renaissance. Oil was important during this historic period in both Painting and Make Up. The women used bright colors and the benefits of oils.**
- **This Tint-in-Oil is a cross-over texture: Make-Up (glam pink lips) and Personal Care (nourishing and plumping lips).**
- **SEPIlift™ DPHP plumps and rejuvenates lips. It also improves lipstick spreadability and provides comfortable wear on lips.**
- **KALPARIANE™ AD maintains suppleness and firmness of the skin.**
- **EMOGREEN™ L19 provides a gliding and comfortable texture. It allows uniform color coverage on lips. It also decreases sticky touch and heavy texture of the paraffin oil.**
- **A plumping tint-in-oil for pink colored lips!**

Raw materials from SEPPIC
EMOGREEN™ L19
C15-19 Alkane (renewable)

EMOGREEN™ L19 is a non polar and biodegradable, bio-sourced emollient. It's THE alternative to silicone oils. This high purity vegetable alkane is conformed to Cosmos and Natrue. It gives a fresh and gliding touch, with a soft afterfeel. Inert and stable, it can be used in all types of applications, even in extreme conditions (ph, oxidizing/reducing media...).

SEPIlift™ DPHP
Dipalmitoyl Hydroxyproline

SEPIlift™ DPHP improves lipstick spreadability and provides comfort wearing on lips. A breakthrough in the field of lipstick technology: botanical hydroxyproline vectorized in lipophilic form. An anti-wrinkle ingredient, SEPIlift™ DPHP moisturizes, redesigns lips and reduces the appearance of fine lines (with immediate and long-term effects), leaving lips softer, better moisturized and ideally restructured so they appear fuller (proven in-vivo on 30 volunteers). Glamour effect guaranteed. Ecocert and Natrue approved.

KALPARIANE™ AD
Caprylic/Capric Triglyceride/Algae Extract

Oily active from alaria esculenta brown alga to maintain suppleness and firmness of the skin. Hydration and suppleness of the skin (in vivo study)
